Microfiber Cloth	\$5.00	Used to dust off your record player and record sleeves
Protective Coverings	\$10.00	Includes a plastic piece to cover the needle point of the record player and a cloth sleeve on the spinn dial when record is not in use.

#### Cleaner Spray -

A special spray can be used to clean your vinyls. It is a unique formula curated as to avoid scratches on the material as well as dulling the look of the vinyl. Simply spray some on and use a velvet brush to dry to leave your vinyl looky fresh and good as new.

#### Velevt Brush -

A velvet brush a special tool used to collect the sut and other debris from your vinyl record without damaging or scratching the material. It is typically crafted with a wooden block as the handle, and a cushiony velvet side. Simply use the cleaner spray on the vinyl, turn on the record player and gently press the brush to the record as it begins to turn

#### Needle Brush -

A needle brush is a small tool used to clean the needle point of the record player. It is created with fine synthetic fibers that gently clean any gathered dust or debris on the needle point from the records. Gently brush the tool against the needle point to use.

#### Microfiber Cloth -

It is important to keep the record player and record sleeves clean as well. Using a microfiber cloth is a quick and easy way to do so, simply using the cloth to dust off both items.

#### Protective Coverings -

Using protective coverings on your record player is crucial in allowing the record player to stay in good condition. Simply slide on the plastic coverings over the needle point head to protect the needle, and rest the cloth cover onto the spin table to prevent dust from gathering where the records lay.

Thank you for trusting Spinning Tune Vinyls with the care of your vinyl records.
